

If FM and AM stations were not full of locally advertised material, people would not have to indulge in XM radio. If people want to spend the extra money each month for this luxury, who are you to take away the services that they are providing to us. I travel through the city of Pittsburgh PA daily to work and enjoy the convenience of knowing what I face on a day to day basis. Traffic in any major city is inevitable and the up to the minute traffic is a wonderful convenience. It's a shame that is more up to date than the traffic that the local stations provide. It should not be the customers that are penalized, it's not our fault.
